

What is your organization doing to **GO GREEN?**

One simple way to join the GREEN MOVEMENT is to reduce paper use within the organization. Did you know that over 4 billion trees worldwide are cut down each year for paper? Part of Extend's mission is to be environmentally responsible. Our Accounts Payable automation solution puts this into practice by converting paper invoices into electronic invoices then recycles the paper for re-use. More importantly, Extend collaborates with our client's vendors to facilitate electronic invoicing alternatives which eliminate paper at the onset. Our offerings allow clients to join the GREEN MOVEMENT and provide significant automation benefits and cost savings to the organization.

Extend manages the high volume, routine invoice paper receipt, data & image capture processes and clients focus on review, approvals & exceptions, spend analysis, and concentrate resources in areas which provide the most value to the organization. Our promise is to provide you with top notch service and the peace of mind knowing that your operations are on par with industry best of breed practices, monitored and reported against Service Level Agreements (SLAs) in a highly controlled and efficient environment.

We invite you to learn more about our Accounts Payable solution. We would be happy to provide you with more information and a live demonstration. Please contact us to schedule a convenient time. We look forward to hearing from you and GOING GREEN!
